DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a method of simulating communication delays among parties at simulated spatial delays, classified in class 703, subclass 106.
 - II. Claims 9-18, drawn to a server, classified in class 706, subclass 25.
 - III. Claims 19-20, drawn to a method of equalizing the effects of network connecting speeds among parties, classified in class 709, subclass 217.
 - IV. Claims 21-28, drawn to a system, classified in class 463, subclass 30.
 - V. Claims 29-33, drawn to a system for terminals, classified in class 709, subclass 218.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, III and IV, V are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process of either Group I or III can be practiced by hand.

3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because no server is required. The subcombination has separate utility such as implementing a point-of-sale device.

4. Inventions IV and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group V has separate utility such as transferring financial data between terminals. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, III, IV and IV, respectively, restriction for examination purposes as indicated is proper.

Art Unit: 3627

7. A telephone call was made to Michael Stuart (Reg. No. 35,698) on September 30, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. Mr. Stuart requested that the restriction requirement be mailed.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Joseph Rudy whose telephone number is 703-308-7808. The examiner can normally be reached on Tuesday thru Friday, 7:30 a.m until 6 p.m..
